

MRL CHART LEGEND

This report includes an MRL Chart for each index commodity included in the results. These charts provide an easy to read MRL reference for comparing across countries. Full regulatory information is provided in the RAC and Processed MRLs tabs.

{0.01} An MRL listed in red text and enclosed in brackets indicates the MRL is more restrictive than the selected perspective market. The perspective market is United States.

* **(asterisk)** indicates additional MRLs in effect and applicable to the raw agricultural commodity and active ingredient. Please see the RAC MRLs tab for all applicable MRLs. The following labels indicate the source of the MRL for countries which defer to other markets' MRL regulations:

Codex refers to the International Food Standards governed by the Codex Alimentarius Commission established by the United Nations' Food and Agriculture Organization (FAO) and World Health Organization (WHO) (www.codexalimentarius.org).

Eur CU indicates the Eurasian Customs Union of Belarus, Kazakhstan, and Russia.

EEA indicates the European Economic Area which applies to Norway, Iceland, and Liechtenstein.

EU is the European Union of 28 member states a list of which can be found in the European Union Market Information page.

US Section 18 indicates a US tolerance established by the US Environmental Protection Agency (EPA) for an unregistered use of a pesticide for a limited time for an emergency condition. If an expiration date has been set, this will be indicated.

US Regional indicates a US tolerance established by the EPA with regional use limitations.

Import Tolerance indicates that the MRL has been set by the country or market for imported products only. The MRL does not apply for domestically produced products, and there is not a domestic registered use.

Exempt indicates that an MRL or tolerance is not required for the pesticide active ingredient in accordance with good agricultural practice on agricultural products as specified in a market's regulations. Please consult the Commodity Notes column of the RAC MRLs tab for the regulatory details of the exemption.

Default indicates that the MRL value displayed is a default tolerance. Some markets defer to a default MRL value when a specific MRL has not been established for a commodity and active ingredient.

Expires Oct 10, 2020 indicates expiration date for an MRL if a revocation has been officially indicated in the MRL regulations

Proposed Revocation indicates the MRL has been proposed to be revoked in a draft proposal, amendment, or petition that is in the regulatory process. These proposed actions are subject to change or withdrawal.

A published processed commodity listed below the MRL indicates an MRL set on a processed food product. The processed commodity term will be listed in red text with an * (asterisk) if a pending or proposed revocation exists for this MRL. Please consult the Expiry Date column of the Processed MRLs tab to determine if the MRL is proposed for revocation, or the MRL pending expiration date.

Pending lists pending regulations.

Proposed lists draft MRL proposals, amendments, or petitions.

<i>Blueberry, highbush</i>	United States	Canada	Hong Kong	Japan	Korea	Taiwan	United Kingdom
